

Dear problem solvers,

Here is a complex one. During the next month, you need to take care of my finances. **\$20,000** is not a lot, but this is all of my disposable capital I can spare to invest. You have exactly **30 days** to trade stocks on all available stock markets. We will start on **November 2**, and the game will end on **December 2**.

1) Open a free account on the MarketWatch website. When you log in for the first time, enter your team name. Use your team email to register: register.marketwatch.com/register?mod=welcome

2) Join the Brainfinity game on the following link:
www.marketwatch.com/game/brainfinity
with the password **brainfinity20**

You can only enter the game before it starts. Once the game is started, you cannot join. If you decide to leave, you cannot rejoin the game.

3) Buy and sell stocks to improve your financial position. Be aware that every trade will cost you **3 dollars**.

Remember, you need to make **at least 1%** of profit to get to the next round, or, in case of a bear market, to be in the **top 20 teams**. Please, choose the companies you want to invest in wisely; the market is volatile, and I would rather earn only one cent than lose anything.

Thank you and best of luck,
Vladislav

IMPORTANT NOTE:

This is a game!
Money is not real, and you will not lose or win any money in real life. Yet, you can win the game, which is the most important thing!
